English

PROFILE

Hi, I'm Ahmad and I graduated from the University of Amirkabir-arak.

In my previous workplace, we took startup projects from customers in different stack technologies and that is the reason that I'm familiar with many technologies.

But at my new workplace, we working on a Shopify app in which I'm responsible for a front-end panel based on React, a pure JavaScript store-front widget, and DevOps workflows.

I love to find optimal ways to do things, with minimum effort and maximum quality.
